

Selecting Your Rain Garden Professional

We've compiled a list of questions that you can use to interview a landscaping professional about your rain garden project:

- How many rain gardens have you designed and constructed in the past?
- Have you taken any rain garden courses, and where? Do you have any certifications?
- Have you ever built a rain garden in my neighborhood?
- Are you aware of any of the financial incentives to building rain gardens?
- How will you test the soil to ensure that I have well-draining soil?
- What will you consider in deciding the location of my rain garden?
- Can you recommend some native plants that would require minimal maintenance for my rain garden?
- Are you licensed and bonded in Washington State?
